

## Flexible Packers With Bypass size 200-300 mm

Flexible packers with bypass are products used to repair pipes that need bypass. They enable to move in the pipe and seize the pipe center. Flexible packers with bypass are manufactured from SBR+NR mixed rubber and strong fabrics. They are able to run between -30°C and + 70°C. They are tested at the 1, 3 times higher than their pressure and they have ultrahigh bursting pressure.

Part Number	Nominal Size	Cylinder Length (mm)	Reguired inflation Pressure (bar)	Product Diameter (mm)	Product Total Length (mm)	Bypass Diameter (inch)	Product Weigth (kg)
