

Pipe Plug size 150-300 mm

Pipe plugs are products which are used to dull the pipelines temporarily. Pipe plugs are made from SBR+NR mixed rubber, nylon cord, kevlar cord and strong fabrics. They are able to run between -30°C and + 70°C. They are tested at the 1, 3 times higher than their working pressure and they have ultrahigh bursting pressure. Their biggest advantage is that they reach the high friction force rate in the working pressure grasping the pipe diameter at very low pressures.

Part Number	Nominal Size	Max Working Pressure (bar)	Rear Working Pressure (bar)	Product Diameter (mm)	Product Total Length (mm)	Bypass Diameter (inch)	Product Weight (kg)
